MIT ROV TEAM MEMBERS

Most Rewarding Experiences:

"I'm going to say the MATE competition down in Houston"
-- Olay Oyebode

"Watching months of hard work come to life"
-- Kurt Stiehl

"Seeing the propellers I've designed get manufactured and used in the water"
-- Jordan Stanway

What we hope to do differently next year:
- Use lithium ion batteries for greater energy density
- Develop a modular payload system to customize MTHR for different types of missions
- Spending more time learning how to drive the robot instead of just building
- Staying more on schedule!
